

SPRING 2017 BEAR HUNTS

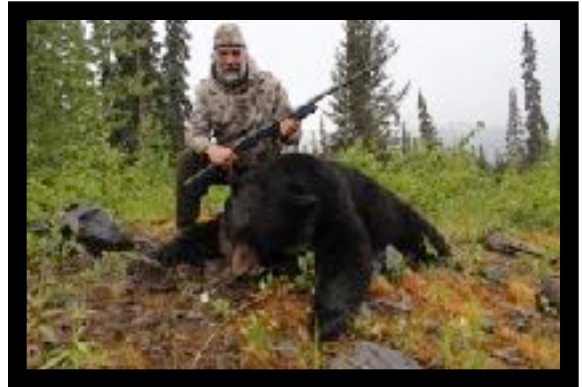

OCEAN BLACK BEAR HUNT

Black bear hunting in the spring is mostly done on the ocean shoreline, where bears concentrate on the first available green grass after emerging from hibernation. We cruise the inlets and fjords in search for trophy black bears.

They are often congregated on massive tidal grass flats, it is not uncommon to see 3-4 mature bears feeding in one place.

This hunt is especially suited for hunters with limited physical abilities or for hunters that just want to relax and enjoy the comfort of a boat hunt. Salmon, king crab and prawns are caught on a daily basis. For more information on this hunt contact Bob or Kelsey.
